diseases, etc. The present invention also discloses the antagonist for resisting the polypeptide and its treatment effect. The present polypeptide. The present invention also discloses the method of The present invention discloses one new kind of polypeptideapplying the polypeptide in treating various diseases, such as human CD63 antigen 15.07, polynucleotide for encoding this embryonic development malformation, tumors immunological polypeptide and DNA recombination process to produce the @ Abstract:

invention also discloses the application of the polynucleotide for encoding human CD63 antigen 15.07.

@ Family:
